Subject: FYI: Educational Grant to Flint
Attachments: U of MI EE Workplan - 2.pdf

FYI - I want to bring to your attention, R5 Air and Radiation Division will provide an environmental education grant to Univ of Michigan, School of Public Health. The grant is intended to provide education to Flint residents to “. . . increase environmental literacy, focus on the drinking water delivery system, sampling, chemical and biological contaminants, and actions to protect the environment provide learning opportunities to trainees to develop sampling plans and **sample water** to assess contaminants school-based extracurricular hands-on interactive programs geared for middle and high school students conduct training, conduct water sampling, recruit additional trainers, the **Genesee County Public Health Department will oversee testing and sample processing.** “

We have a public outreach effort in Flint and this grant is something those folks may want to be aware of. The workplan is attached. The ARD contact person is Helen Mollsen.
